

Aesthetic Procedures

Chemical Peels - \$65 to \$150 (depending on depth)

Chemical peels use a chemical solution to remove the damaged outer layers of your skin and improve the overall texture and condition of your complexion by promoting the growth of new skin. An ideal treatment for those with mild acne scars, sun-damaged skin, age spots, fine lines, wrinkles and uneven skin pigmentation.

Microdermabrasion - \$75 to \$125

A non-surgical skin rejuvenation procedure that is effective in treating dry, patchy skin, acne-prone skin, as well as minimizing fine lines. Treatment works by using gentle abrasives to exfoliate the skin for a healthy glow and improved skin condition.

Boot Camp Package \$375

- 3 Clarifying Peels
- 3 Microdermabrasions

*Suggested treatment every two weeks. Package expires 6 months from purchase date

Dermal Infusion

Dermal infusion eliminates time gaps between exfoliation and serum application with an exclusive simultaneous infusion technology. By infusing the skin with serums at the moment of exfoliation, skin experiences maximum penetration of active ingredients at optimal skin depths. Plumpness, volume, hydration, tone, and texture are optimized in this medical grade treatment. The key to the Dermal Infusion technology lies in its line of specifically formulated, professional strength Pro-Infusion serums. Each serum is the product of advanced research in skin care science and is tailored to fit your needs.

- 1 treatment.....\$175
- 3 treatments.....\$495
- 6 treatments.....\$930

*Suggested treatment every two weeks initially then every 4-6 weeks as maintenance. Package expires 9 months from time of purchase.

Spider Vein Treatments

A combination treatment of sclerotherapy and laser usually does best for those small yet unsightly clusters of blue, red, or purple veins. Sclerotherapy is a simple procedure, where veins are injected with a sclerosing solution, which causes the veins to collapse and fade from view. Our vascular laser (Nd:YAG) is ideal for vessels around the ankles or capillaries that are too small to treat with sclerotherapy.

*Pricing dependent upon density and quantity of vessels, with pricing typically starting around \$300 per session.

IPL (Intense Pulsed Light)

IPL treats many signs of sun damage and aging including brown spots, blood vessels, and helps to stimulate collagen production. Great for anti-aging treatments and for an after summer rejuvenation!

*On average it takes 3 treatments, 1 month apart to get maximum benefit. Package expires 6 months from time of purchase.

Packages of 3 treatments

- Face.....\$1000
- Neck.....\$1000
- Chest.....\$1300

More treatments on the back!

Neurotoxins

Soften or eliminate the wrinkles between your eyebrows, crows feet, and forehead lines using Botox® or Dysport®. Cost traditionally ranges from \$225-\$500.

Filler

Let us take years off your face by replacing the volume that time has taken away! Fillers can redefine your cheek bones, diminish your nasolabial folds, laugh lines, tear troughs, and temples. Fillers can be used to naturally enhance your lips and camouflage your lip lines and jowls. Let us help take the confusion out of which product is best for you by scheduling your free consultation. Pricing beginning at \$650 per syringe.

Collagen Induction Therapy (CIT)

CIT is a revolutionary treatment to improve your skin's texture, reduce fine lines, and soften scars. It is suitable for most skin types and all areas of the face. The treatment promotes the natural reproduction of collagen and elastin, making the skin feel smoother and tighter. CIT is minimally invasive with significant improvement in collagen reproduction. Sold as a package of five treatments.

Package of 5 treatments

*Recommend 1 treatment every 4 weeks. Package expires 9 months from time of purchase.
